

Hi,

I \*do not\* want a law passed that forces DRM into Televisions and Computer Hardware. I do not want the extra cost, the delays it will create and the stifling of innovation. The MPAA/RIAA needs to wake up and realize their antiquated cartel-like business model has been surpassed by a decentralized network called the Internet. Laws and legislation should not be passed to protect their minority interests. I have been waiting for HD television for a long time and am tired of lagging behind such countries as Japan and Europe.

Thank you.

-Tim
